

Genetic susceptibility  
Infectious and environmental triggers/ Microbiota

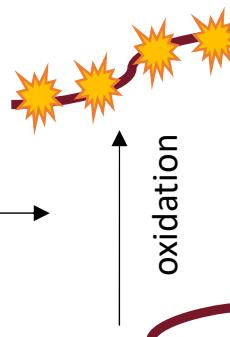

miRNA

Neutrophil hyperactivation

Carbonyled fibrinogen

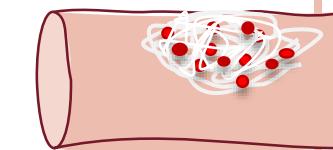

ROS

Fibrinogen

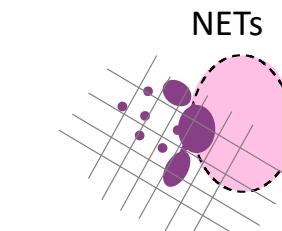

Plasmin

Plasmin-resistant fibrin clot

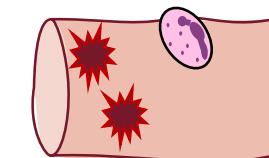

Thrombin

Endothelial infiltration

Endothelial dysfunction

Platelet activation

### Arterial and venous events in BS

Central venous thrombosis

Intracardiac thrombosis

Budd-Chiari syndrome

Vena cava thrombosis

Pulmonary artery involvement

Pseudoaneurysm

DVT/SVT

Immunosuppressants  
+/- anticoagulants

Diet modulation

**Therapeutic approach**
